

CALL FOR PAPERS

Special Issue “Modelling and Simulation of Social-Behavioural Phenomena”

EURASIAN JOURNAL OF MATHEMATICAL AND COMPUTER APPLICATIONS

Guest Editors:

Prof. Leonidas Sakalauskas, Vytautas Magnus University, Lithuania

Prof. Maksat Kalimoldayev, Al-Farabi Kazakh National University, Kazakhstan

Prof. Madina Mansurova, Al-Farabi Kazakh National University, Kazakhstan

The growing challenges of societal sustainability, social complexity, and cohesion are becoming increasingly acknowledged in the scientific community. However, there is a conceptual and analytical gap in understanding the driving forces behind them. The application of mathematical and computer modelling to study social sciences and humanities issues is undergoing rapid development.

The special issue with contributions presented at the 3rd International Conference “Modelling and Simulation of Social-Behavioural Phenomena in Creative Societies” (MSBC-2024) will be published in the top-rated journal “Eurasian Journal of Mathematical and Computer Applications.”

The issue aims to highlight and explore original theoretical and practical advances in game theory, structural equation modelling, agent-based modelling, and other fields of applied mathematics, operations research, and computational intelligence, required for their social-economic applications.

All papers will be peer-reviewed following EJMCA requirements. The deadline for paper submissions to MSBC-2024 Secretariat is **February 15, 2025**.
